SMART WATCH

-The first fully digital watch was produced in 1972 by the Swiss Hamilton Watch Company

-They were called Pulsar

-there are many brands such as samsung, amazfit, and others

-with watches we can listen to music, write messages, make calls, on some of them we can also play games, make payments,watch sports activities

-there are many types, for example, some are intended more for athletes and others, for example, for those who work in the office (they can get things done faster with just a watch)
