

Fake eyelashes

They were invented in 1911, in Canada
by Anna Taylor

they were invented to protect against electric lights

they were made by gluing multiple hairs together
with a thin strip of glue

They are popular because they give
you more dramatic look

They can be dangerous, you can have
allergic to the glue

if you glue them wrong, you can tear off your own
eyelashes

Mostly girl use it

if you glue them incorrectly or if
you have glue in your eye, you
can get an infection

approximately 33% of
women use false eyelashes
every day
